Delta Vision
650 Capitol Mall
Sacramento, California 95814

September 17, 2008

I was recently made aware of the plan Delta Vision has to take control of 37,000 acres of land in the county of San Joaquin. As a land owner and business owner in the county I disagree with this plan totally. A plan to kill 37,000 acres of some of the most productive farm land in the world is apprehensible. A plan not to take care of the levee system, rivers, and bypasses already in place and spend billons on a new canal is a bad plan. Not to mention an attempt to remove long established land owners and families from their land by the way of eminent domain is a bad plan and over the top. To hide this from the people that it would affect is criminal. This was not disclosed at the meeting in Stockton August 28, 2008. We all need water and a new canal with no new water to fill it is useless. A plan to build water storage is a plan for the future. This plan to rob the people here in San Joaquin County of their property is criminal. The state of California needs more water storage; the system to move it through the state is already in place, it needs to be taken care of. If this is the best plan the blue ribbon task force can come up with it should be replaced with responsible people that know what is best for California.

Sincerely

Gina Del Carlo
