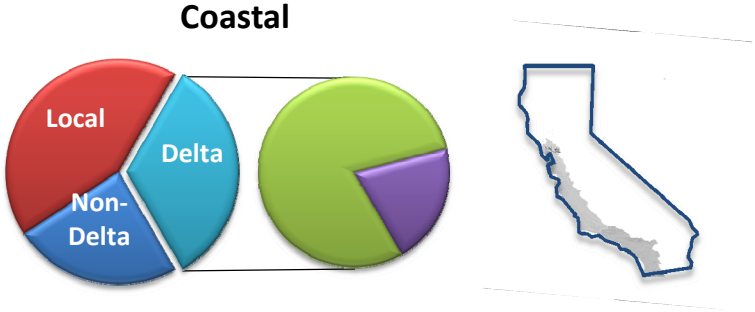
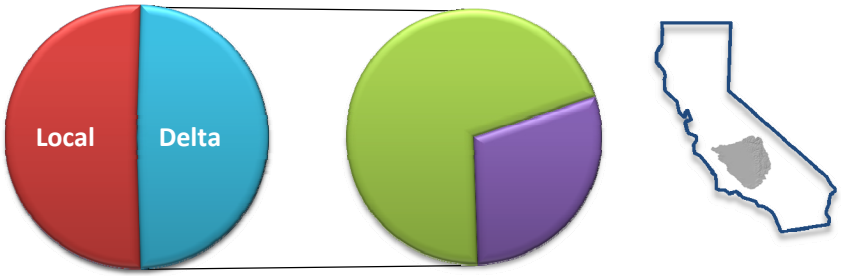
Water Supply Source by Region
(WY 2000)

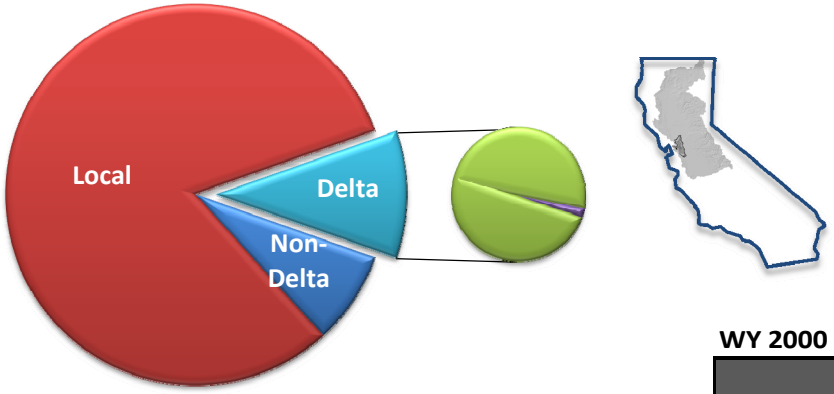
Coastal



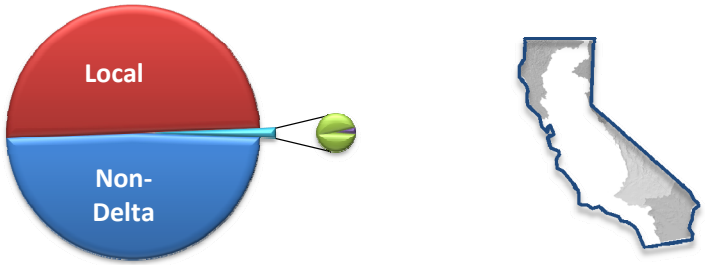
Tulare Basin



Delta Watershed



Other



- Imported Non-Delta Supply
- Local Supply (surface and groundwater)
- Directly Diverted from the Delta
- Diverted from a Delta Tributary

WY 2000 Regional Water Supplies (1,000 acre-feet)

Region	Water Supply Imported from			Total Delta Imports	Total Imports	Local Supply[1]	Total Supply
	Delta	Delta Tributary	Non-Delta Source				
Coastal	1,780	465	1,620	2,245	3,865	2,924	6,789
Delta Watershed	1,480	35	1,110	1,515	2,625	12,167	14,792
Tulare Basin	2,875	1,210	0	4,085	4,085	4,300	8,385
Other	110	5	4,460	115	4,575	1,720	6,295

Notes: 1. Local supply includes surface and groundwater resources used to meet the demands in WY 2000.
2. Values shown are derived from data in the 2005 California Water Plan Update
