

To discuss:

Ideas and elements:

1. Public safety and disaster preparation
2. Land use
3. Ecosystem (Delta as estuary) – how make co-equal? How handle conflict with water? How further specify what this means?
4. Water – add more re quality? For human use? Expectations re amounts?
5. Six policies woven together: Estuary ecosystem and exports; conservation and construction; storage and conveyance
6. Link to California economy and California future
7. Delta as place – how explain? Schedule discussion of how to protect for October?
8. Flood plain – protection? Purchase or regulate? Link to conjunctive use?
9. Governance – What needs governance: Enhancing Delta estuary ecosystem while exporting water? Of Delta space? Across water shed? Of operations?
10. Expecting no substantial “new” water supply, encourage faster action on DWR identified ways to use water more effectively and also to obtain limited amounts of new water through desalinization or other technologies
11. Near term actions – 30 to 90 days
12. Other services from the Delta
13. Finance

Presentation and style:

Adopt the presentation structure of 9.19 draft?

Graphic images and figures?

Phase recommendations? Already have 30 – 90 days, what about 0-3 years, 3-10 years, 10-60, 60-100?
