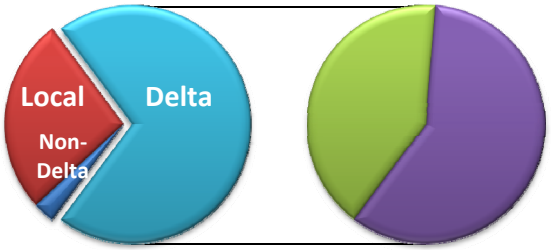
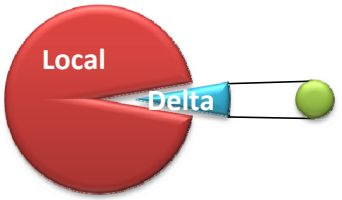
Breakdown of Coastal Region Water Supply Source (WY 2000)

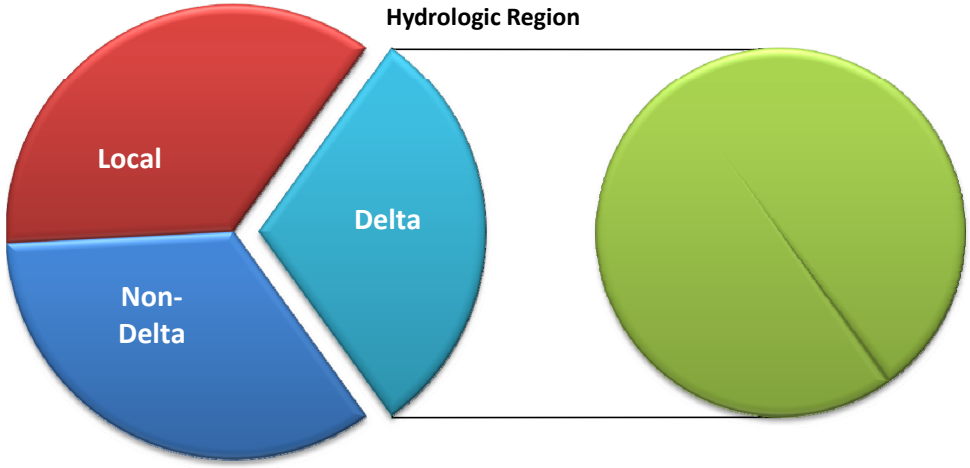
San Fransico Bay
Hydrologic Region



Central Coast
Hydrologic Region



SouthCoast
Hydrologic Region



- Imported Non-Delta Supply
- Local Supply (surface and groundwater)
- Directly Diverted from the Delta
- Diverted from a Delta Tributary

WY 2000 Water Supplies (1,000 acre-feet)

DWR Hydrologic Region	Water Supply Imported from:			Total Delta Imports	Total Imports	Local Supply[1]	Total Supply
	Delta	Delta Tributary	Non-Delta Source				
San Francisco Bay	325	465	33	790	823	305	1,128
Central Coast	55	0	0	55	55	912	967
South Coast	1,402	0	1,589	1,402	2,991	1,703	4,694

Notes: 1. Local supply includes surface and groundwater resources used to meet the demands in WY 2000.
2. Values shown are derived from data in the 2005 California Water Plan Update
